

Simple Green CBD products
devine nervine herb co.

PLEASE NOTE: This is not medical advice. The results and effects of all plant medicines vary from person-to-person and day-to-day. This is especially true for cannabis products. Approach with caution. Start with small doses (3-5 drops) and increase as needed as you learn how the plant works for you.

We grow our plants the old fashioned way: from seed, in dirt, under the bright Southern Oregon sun. No pesticides or chemicals are used. We fertilize with manures.

After harvest and drying, traditional folk methods are used to extract the vital plant constituents.

Salve is made by extracting plant constituents into olive oil and combining with beeswax to harden. Tincture is created by extracting plant constituents into high proof alcohol.

Salve is used topically to address inflammation and pain and is excellent for massage. Tincture is taken orally.

Full Spectrum products are blended from high quality tested strains at 1:1 CBD to THC. Full spectrum products work best in the management of chronic long term pain. They can reduce inflammation, increase appetite and help relax and sedate you. Useful for arthritis, migraines, insomnia.

Pure Hemp CBD products are created from varieties that test at 11-14% CBD and less than .3% THC. Pure Hemp products are best for acute pain from recent injury or short term issues such as period pain. Also anti-inflammatory, it can aide digestion and take the edge off anxiety, depression and other mood disorders.

Results can vary! If you undergo drug testing at work, or if you do not wish to have any THC in your system, the pure hemp products will be the best choice for you.
